Vice Captain Mahendar N

At RPS , this time (2019) we tried to mimic the complete democratic election process as it happens in our country . The aim was to make students appreciate what is happening in our society and comprehend the process in a positive way.

After the process of following step by step approach of the election laid out by election committee with . Mr Antony as the chief election co-ordinator and his team. The entire process worked under the guidance of the Chairman Sri Cariappa ,CEO Smt Sujani Cariappa, Principal Smt Geetha.Students were elected for the 13 posts created for the academic year 2019-2020.

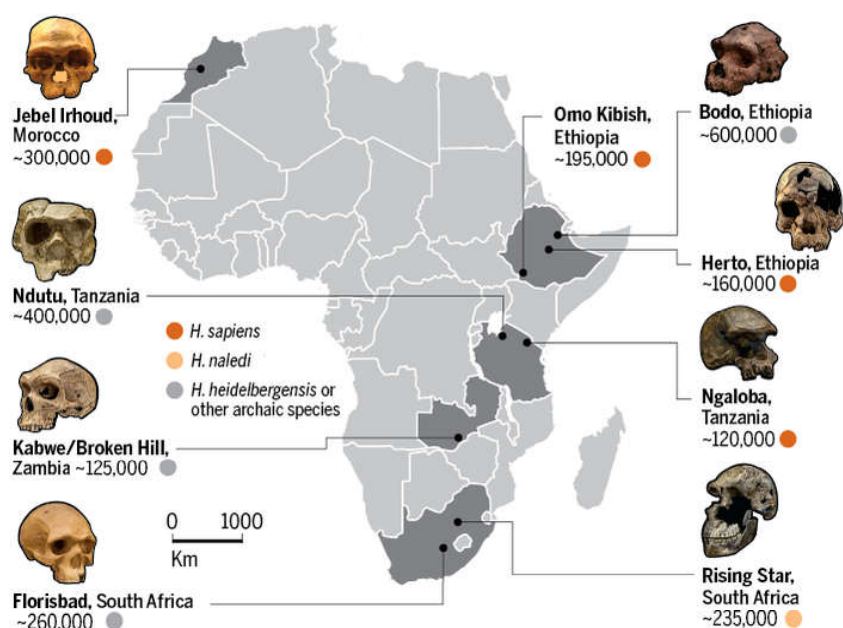

Best wishes and congratulations to all the students elected .

A brief of facts is as below.

Last day for filing Nomination: 30th May .Nomination Scrutinization process by election committee. 29 candidates cleared the nomination process. All the 29 students canvassed for their election in accordance to norms given by committee.On 7th June the voting ,counting and result announcement were made.

Investiture Ceremony on June 10th:The entire programme was co-ordinated by MrAntony.S and Team. The elected students marched to the stage and took oath,vested and honoured by the dignitaries.On this occassion the faculty members also took oath, pledging their sincere efforts for the betterment of each student and the institution in every sphere. And build their own capacity as a teacher every single day.

Human Civilization

What is the connection between these old skeletons ,X-Men origin and we in Mysuru City ? Well its intresting ,read on .

Now we are here for nearly 3 Lakh years evolved as human beings !

Researchers have redated a long-overlooked skull from a cave called Jebel Irhoud to a startling 300,000 years ago, and unearthed new fossils and stone tools.

The result is the oldest well-dated evidence of Homo sapiens .

Paleoanthropology is the scientific study of human evolution. Paleoanthropology is a subfield of anthropology, the study of human culture, society, and biology.

The field involves an understanding of the similarities and differences between humans and other species in their genes, body form, physiology, and behavior.

India is also making scientific studies and research in these fields. We should also be delighted to know that the South India Regional Anthropological Socceity is located in our own Mysuru City and that too in Bogadi 2nd Stage. Website: <https://ansi.gov.in>

Evolution occurs when there is change in the genetic material -- the chemical molecule, DNA -- which is inherited from the parents, and especially in the proportions of different genes in a population. Information contained in the DNA can change by a process known as mutation. The way particular genes are expressed -- that is, how they influence the body or behavior of an organism -- can also change.

Now the scientific basis behind the all-famous X-men series of hollywood movies should be clear,though its fiction.

Interesting Trivia

Two dogs named Rocky and Barco were customs officers in the United States in 1988. They were so good at patrolling the border between Texas and Mexico that Mexican drug lords offered a reward for their heads in the amount of \$ 30 000.

The Strength to Stand Tall

Once upon a time, there were two neighbors living next to each other.

One of them was Ramu , a principled and living life in simple terms and another person called Dhanshyam , was a seemingly rich who had a lot of interest in living an extravagant life.

Both of them had planted different plants in their garden. Ramu was giving a small amount of water to his plants and didn't always give a full attention to them.

While Dhanshyam, had given a lot of water to his plants and looked after them too well. The Ramu's plants were simple but looked good. The Dhanshyam's plants were much fuller and greener. One day, during the night, there was a heavy rain and a wind due to a minor storm. Next morning, both of the neighbors came out to inspect the damage to their garden. Dhanshyam saw that his plants came off from the roots and were totally destroyed. But, Ramu's plants were not damaged at all and were standing firm. Dhanshyam was surprised to see it, he went to the Ramu and asked, "We both grew the same plants together, I actually looked after my plants better than you did for yours, and even gave them more water. Still, my plants came off from the roots, while yours didn't. How is that possible?"

The Ramu smiled and said, "You gave your plants more attention and water, but because of that they didn't need to work themselves for it. You made it easy for them. While I gave them just an adequate amount of water and let their roots search for more. And, because of that, their roots went deeper and that made their position stronger. That is why my plants survived".

Essence:

Work hard and understand that your caretakers have your best interests in the long run. When they say 'No' to certain things and make you work hard, it means they are making you stronger.

World Environment Day

2019 World environment day was celebrated meaningfully at our campus .The environment Day 2019 was conducted with Mr Mandara as the chief co-ordinator of Environment Day and his teammates.

Our special thanks to the Chief Guest Sri Yogendra B.S , Education Officer ,Regional Museum of National History ,Mysuru for his presence on the occasson.His insistance to 'Act rather than just hear' to the students was well received by the audience.

Invocation Prayer was sung by Vaibhavi ,Information regarding the 'Environment Day' was given by Darshit . A thought provoking play by an NGO team 'Kriya' was enacted and cultural activities were conducted bringing the understanding of serving our environment to the minds of our students with more depth.
